Mark R. Newton, CPA

	Page 5	Page 1
1	Q. (BY MS. LUKE) Just as a reminder, Mr. Newton,	A. I got that license, let's see, two years ago.
2	I know that you have been deposed many times or have	2 I'm not I don't recall exactly when, probably about
3	testified many times, but I think with these virtual	3 three or four years ago.
4	depositions it's really important that we do not	4 Q. Okay. And aside from that Arizona license
5	interrupt each other to the best we can. Feel free to	5 that should now be included, is there anything else in
6	ask for a break if you need one. And I will have many	6 here that is missing for the most current version of
7	inartful questions, so please feel free to ask for	your CV?
8	clarification if you don't understand what I'm asking	8 A. I think the only other thing is under
9	or a question.	9 professional associations I still have I've been
10	Please state your name your full name and	having difficulty renewing the National Association of
11	your professional address.	Forensic Economists on their website, so I need to
12	•	,
	A. Mark Richard Newton, and my professional	, ····, ····, ····, ····, ···, ···
13	address is JS Held is my company and it's 3535	my dues and rejoin that, but I've been a member of that
14	Factoria Boulevard Southeast, Suite 440, Bellevue,	14 for many years.
15	Washington and the zip is 98006.	The last item on the professional associations
16	Q. Great. And I'm going to have you pull an	called Loss Executives Association, I'll have to check,
17	exhibit, I'm going to mark what's titled 90-5 - 3.9.20	I may not be a member of that because of the situation
18	Newton Report. You should have that there.	with the company, for JS Held, and that organization
19	A. Yes.	has a limitation of how many what they call associate
20	Q. And I'm going to mark that as Exhibit A to	20 members can be
21	your deposition.	Q. I'm sorry, Mr. Newton, I'm getting a lot of
22	A. Okay.	feedback on your end and I don't know or skipping.
23	 Q. And if you want to scroll through that report 	23 I'm not sure if I'm the only one.
24	for just a second, does this look to be a true and	24 COURT REPORTER: No, I am as well.
25	accurate version of your report that is dated March 9,	25 (Discussion off the record.)

Yeah, it's probably not exactly 100 percent accurate because I in this version I left off my CPA license because I submitted my application late and so for I'm not sure, but for a short period I didn't technically have my license so that's why I left it off of there. I believe I'm approved, although I'm not 100 percent sure because I've never received a letter from them, so when I went on the website in Arizona it indicates my license continues through 2022, February	Q. (BY MS. LUKE) Okay. Mr. Newton, I think you were explaining some updates to your CV and you were discussing some changes under professional associations. Can you explain that again? A. Yes. On the National Association of Forensic Economists, I need to renew that. So I think technically that's lapsed, but I intend to renew that. I was having difficulty with their website, so I need to follow through on that. I've been a member of that for probably at least 15 to 20 years. The Loss Executives Association, I may not be a member of that any longer because my old company, HSNO, was acquired by JS Held, and that organization has a limitation on how many what they call associate members are allowed in the organization, and I'll have to double-check on that, but I had volunteered to give that up to other people in JS Held if necessary. Q. Okay. And just going back to your licenses in Arizona, do you know offhand your license number for Arizona? A. It's no, not offhand.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	2020? A. Yes, it appears to be just scanning through it, yeah. Q. Okay. And the first part of this document includes your well, actually Exhibit 1 to your report is your CV. A. Yes. Q. And I believe that begins on page 9 of the PDF if you want to scroll down to that? A. Correct, I got it. Q. Is that CV a complete and accurate and most recent copy? A. Yeah, it's probably not exactly 100 percent accurate because I in this version I left off my CPA license because I submitted my application late and so for I'm not sure, but for a short period I didn't technically have my license so that's why I left it off of there. I believe I'm approved, although I'm not 100 percent sure because I've never received a letter from them, so when I went on the website in Arizona it indicates my license continues through 2022, February 2022. So they must have approved it, but I haven't	Q. (BY MS. LUKE) Okay. Mark R. Newton, CPA

	Page 9	Page 11
1	recently presented seminars, did you have any update	1 you look in the dictionary it just means that you
2	since that 2017 Wind Energy Losses seminar?	2 really testify in court about your area of expertise.
3	A. No, I don't have any other I don't believe	3 It's come to be thought of as investigative as well
4	so, any others after that.	4 because of the TV shows that have forensic doctors and
5	Q. What was the I think the third one down	5 medical people, that kind of thing, but it's sort of
6	no, sorry, second one down, Econonuggets - Personal	6 thought of now as investigative, but I think of it more
7	Injury, can you tell me what was that presentation or	7 as related to testifying in court for the most part,
8	seminar about?	8 but it's extended even to the areas of services my
9	A. That was it was kind of a variety of	9 company provides or people like me provide in
10	subjects involving personal injury. I can't remember	10 non-litigation contexts. Like we do a lot of insurance
11	exactly the topics. I just recall that I covered a	11 claim work for insurance companies on property claims
12	number of things that I thought would be interesting to	12 and they usually call us forensic accountants even
13	lawyers dealing with personal injury cases. The WDTL	though most of the time those are not in litigation.
14	is the Washington Defense Trial Lawyers Association.	14 Q. And so your firm, JS Held, only does forensic
15	Q. Okay. And then going down a little bit	15 accounting and not the audits or taxes that we hear
16	further, I noticed there was Preventing Pain - Punitive	16 about CPAs doing in other contexts?
17	Damages?	A. Well, the forensic accounting division, yes,
18	A. Yes.	18 that's true. The forensic accounting division which
19	Q. Can you tell me about what did you present on	19 I'm part of HSNO, which was purchased by JS Held
20	for that seminar?	about a year ago, became essentially the forensic
21	A. That seminar was I have a vague	21 accounting division for JS Held, and that division is
22	recollection. That was back in 2008, so but it was	22 strictly what I would call forensic accounting in 23 general and we don't do any kind of regular audits and
23 24	discussing sort of the financial elements of looking at punitive damages. So, in other words, from a forensic	, ,
25	accounting perspective analyzing financial statements	24 tax and bookkeeping, that kind of thing. 25 The non there are a lot of other divisions
23	accounting perspective analyzing infancial statements	23 The holf there are a lot of other divisions

2 3 4 5 6 7 8 9 10 11	of a defendant who might be subject to punitive damages. Q. Okay. And what what is your profession? A. Well, I'm a certified public accountant and my specialty has been really for essentially my entire career since 1974 been in forensic accounting and economics, although back when I started we didn't I don't think anybody used the term "forensic accountant" back in the '70s, that's a term that came up later, but pretty much from the beginning I've been involved with determining damages. Q. Okay. So as a CPA do you ever help prepare	in JS Held that are not related to accounting, including construction consulting and environmentalists, environmental consulting, toxicology, there's a lot of different services the company provides overall. Q. And is most of that work or a large portion of that work for litigation purposes? A. I believe so, yes, they do offer that, the other services for litigation purposes, yes. Q. And do you do any other work other than forensic accounting? A. For JS Held?
2 3 4 5 6 7 8 9 10 11 12 13	of a defendant who might be subject to punitive damages. Q. Okay. And what what is your profession? A. Well, I'm a certified public accountant and my specialty has been really for essentially my entire career since 1974 been in forensic accounting and economics, although back when I started we didn't I don't think anybody used the term "forensic accountant" back in the '70s, that's a term that came up later, but pretty much from the beginning I've been involved with determining damages. Q. Okay. So as a CPA do you ever help prepare taxes or anything like that?	in JS Held that are not related to accounting, including construction consulting and environmentalists, environmental consulting, toxicology, there's a lot of different services the company provides overall. Q. And is most of that work or a large portion of that work for litigation purposes? A. I believe so, yes, they do offer that, the other services for litigation purposes, yes. Q. And do you do any other work other than forensic accounting? A. For JS Held? Q. For JS Held or outside of your capacity as a
2 3 4 5 6 7 8 9 10 11 12 13	of a defendant who might be subject to punitive damages. Q. Okay. And what what is your profession? A. Well, I'm a certified public accountant and my specialty has been really for essentially my entire career since 1974 been in forensic accounting and economics, although back when I started we didn't I don't think anybody used the term "forensic accountant" back in the '70s, that's a term that came up later, but pretty much from the beginning I've been involved with determining damages. Q. Okay. So as a CPA do you ever help prepare taxes or anything like that? A. No, I don't do that professionally. I I	in JS Held that are not related to accounting, including construction consulting and environmentalists, environmental consulting, toxicology, there's a lot of different services the company provides overall. Q. And is most of that work or a large portion of that work for litigation purposes? A. I believe so, yes, they do offer that, the other services for litigation purposes, yes. Q. And do you do any other work other than forensic accounting? A. For JS Held? Q. For JS Held or outside of your capacity as a partner at JS Held.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	of a defendant who might be subject to punitive damages. Q. Okay. And what what is your profession? A. Well, I'm a certified public accountant and my specialty has been really for essentially my entire career since 1974 been in forensic accounting and economics, although back when I started we didn't I don't think anybody used the term "forensic accountant" back in the '70s, that's a term that came up later, but pretty much from the beginning I've been involved with determining damages. Q. Okay. So as a CPA do you ever help prepare taxes or anything like that? A. No, I don't do that professionally. I I don't think I ever did taxes professionally. Back when	in JS Held that are not related to accounting, including construction consulting and environmentalists, environmental consulting, toxicology, there's a lot of different services the company provides overall. Q. And is most of that work or a large portion of that work for litigation purposes? A. I believe so, yes, they do offer that, the other services for litigation purposes, yes. Q. And do you do any other work other than forensic accounting? A. For JS Held? Q. For JS Held or outside of your capacity as a partner at JS Held. A. Yeah, JS Held well, technically I'm not a
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	of a defendant who might be subject to punitive damages. Q. Okay. And what what is your profession? A. Well, I'm a certified public accountant and my specialty has been really for essentially my entire career since 1974 been in forensic accounting and economics, although back when I started we didn't I don't think anybody used the term "forensic accountant" back in the '70s, that's a term that came up later, but pretty much from the beginning I've been involved with determining damages. Q. Okay. So as a CPA do you ever help prepare taxes or anything like that? A. No, I don't do that professionally. I I don't think I ever did taxes professionally. Back when we started, when I started with the company which we	in JS Held that are not related to accounting, including construction consulting and environmentalists, environmental consulting, toxicology, there's a lot of different services the company provides overall. Q. And is most of that work or a large portion of that work for litigation purposes? A. I believe so, yes, they do offer that, the other services for litigation purposes, yes. Q. And do you do any other work other than forensic accounting? A. For JS Held? Q. For JS Held or outside of your capacity as a partner at JS Held. A. Yeah, JS Held well, technically I'm not a partner. Since last June I'm only an employee.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	of a defendant who might be subject to punitive damages. Q. Okay. And what what is your profession? A. Well, I'm a certified public accountant and my specialty has been really for essentially my entire career since 1974 been in forensic accounting and economics, although back when I started we didn't I don't think anybody used the term "forensic accountant" back in the '70s, that's a term that came up later, but pretty much from the beginning I've been involved with determining damages. Q. Okay. So as a CPA do you ever help prepare taxes or anything like that? A. No, I don't do that professionally. I I don't think I ever did taxes professionally. Back when we started, when I started with the company which we called HNSO Accountancy in 1974, we did do some the	in JS Held that are not related to accounting, including construction consulting and environmentalists, environmental consulting, toxicology, there's a lot of different services the company provides overall. Q. And is most of that work or a large portion of that work for litigation purposes? A. I believe so, yes, they do offer that, the other services for litigation purposes, yes. Q. And do you do any other work other than forensic accounting? A. For JS Held? Q. For JS Held or outside of your capacity as a partner at JS Held. A. Yeah, JS Held well, technically I'm not a partner. Since last June I'm only an employee. Q. I understand.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	of a defendant who might be subject to punitive damages. Q. Okay. And what what is your profession? A. Well, I'm a certified public accountant and my specialty has been really for essentially my entire career since 1974 been in forensic accounting and economics, although back when I started we didn't I don't think anybody used the term "forensic accountant" back in the '70s, that's a term that came up later, but pretty much from the beginning I've been involved with determining damages. Q. Okay. So as a CPA do you ever help prepare taxes or anything like that? A. No, I don't do that professionally. I I don't think I ever did taxes professionally. Back when we started, when I started with the company which we called HNSO Accountancy in 1974, we did do some the firm did taxes and some audits and regular sort of	in JS Held that are not related to accounting, including construction consulting and environmentalists, environmental consulting, toxicology, there's a lot of different services the company provides overall. Q. And is most of that work or a large portion of that work for litigation purposes? A. I believe so, yes, they do offer that, the other services for litigation purposes, yes. Q. And do you do any other work other than forensic accounting? A. For JS Held? Q. For JS Held or outside of your capacity as a partner at JS Held. A. Yeah, JS Held well, technically I'm not a partner. Since last June I'm only an employee. Q. I understand. A. I'm no longer an owner of the business.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	of a defendant who might be subject to punitive damages. Q. Okay. And what what is your profession? A. Well, I'm a certified public accountant and my specialty has been really for essentially my entire career since 1974 been in forensic accounting and economics, although back when I started we didn't I don't think anybody used the term "forensic accountant" back in the '70s, that's a term that came up later, but pretty much from the beginning I've been involved with determining damages. Q. Okay. So as a CPA do you ever help prepare taxes or anything like that? A. No, I don't do that professionally. I I don't think I ever did taxes professionally. Back when we started, when I started with the company which we called HNSO Accountancy in 1974, we did do some the firm did taxes and some audits and regular sort of accounting which I did some of that for my experience,	in JS Held that are not related to accounting, including construction consulting and environmentalists, environmental consulting, toxicology, there's a lot of different services the company provides overall. Q. And is most of that work or a large portion of that work for litigation purposes? A. I believe so, yes, they do offer that, the other services for litigation purposes, yes. Q. And do you do any other work other than forensic accounting? A. For JS Held? Q. For JS Held or outside of your capacity as a partner at JS Held. A. Yeah, JS Held well, technically I'm not a partner. Since last June I'm only an employee. Q. I understand. A. I'm no longer an owner of the business. Q. I understand.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	of a defendant who might be subject to punitive damages. Q. Okay. And what what is your profession? A. Well, I'm a certified public accountant and my specialty has been really for essentially my entire career since 1974 been in forensic accounting and economics, although back when I started we didn't I don't think anybody used the term "forensic accountant" back in the '70s, that's a term that came up later, but pretty much from the beginning I've been involved with determining damages. Q. Okay. So as a CPA do you ever help prepare taxes or anything like that? A. No, I don't do that professionally. I I don't think I ever did taxes professionally. Back when we started, when I started with the company which we called HNSO Accountancy in 1974, we did do some the firm did taxes and some audits and regular sort of accounting which I did some of that for my experience, but within about four or five years after I started the	in JS Held that are not related to accounting, including construction consulting and environmentalists, environmental consulting, toxicology, there's a lot of different services the company provides overall. Q. And is most of that work or a large portion of that work for litigation purposes? A. I believe so, yes, they do offer that, the other services for litigation purposes, yes. Q. And do you do any other work other than forensic accounting? A. For JS Held? Q. For JS Held or outside of your capacity as a partner at JS Held. A. Yeah, JS Held well, technically I'm not a partner. Since last June I'm only an employee. Q. I understand. A. I'm no longer an owner of the business. Q. I understand. A. So it's a little different role than I had for
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	of a defendant who might be subject to punitive damages. Q. Okay. And what what is your profession? A. Well, I'm a certified public accountant and my specialty has been really for essentially my entire career since 1974 been in forensic accounting and economics, although back when I started we didn't I don't think anybody used the term "forensic accountant" back in the '70s, that's a term that came up later, but pretty much from the beginning I've been involved with determining damages. Q. Okay. So as a CPA do you ever help prepare taxes or anything like that? A. No, I don't do that professionally. I I don't think I ever did taxes professionally. Back when we started, when I started with the company which we called HNSO Accountancy in 1974, we did do some the firm did taxes and some audits and regular sort of accounting which I did some of that for my experience, but within about four or five years after I started the company pretty much was 100 percent forensic	in JS Held that are not related to accounting, including construction consulting and environmentalists, environmental consulting, toxicology, there's a lot of different services the company provides overall. Q. And is most of that work or a large portion of that work for litigation purposes? A. I believe so, yes, they do offer that, the other services for litigation purposes, yes. Q. And do you do any other work other than forensic accounting? A. For JS Held? Q. For JS Held? Q. For JS Held well, technically I'm not a partner at JS Held. A. Yeah, JS Held well, technically I'm not a partner. Since last June I'm only an employee. Q. I understand. A. I'm no longer an owner of the business. Q. I understand. A. So it's a little different role than I had for about 40 years at HSNO, but anyway, I'm just an
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	of a defendant who might be subject to punitive damages. Q. Okay. And what what is your profession? A. Well, I'm a certified public accountant and my specialty has been really for essentially my entire career since 1974 been in forensic accounting and economics, although back when I started we didn't I don't think anybody used the term "forensic accountant" back in the '70s, that's a term that came up later, but pretty much from the beginning I've been involved with determining damages. Q. Okay. So as a CPA do you ever help prepare taxes or anything like that? A. No, I don't do that professionally. I I don't think I ever did taxes professionally. Back when we started, when I started with the company which we called HNSO Accountancy in 1974, we did do some the firm did taxes and some audits and regular sort of accounting which I did some of that for my experience, but within about four or five years after I started the company pretty much was 100 percent forensic accounting.	in JS Held that are not related to accounting, including construction consulting and environmentalists, environmental consulting, toxicology, there's a lot of different services the company provides overall. Q. And is most of that work or a large portion of that work for litigation purposes? A. I believe so, yes, they do offer that, the other services for litigation purposes, yes. Q. And do you do any other work other than forensic accounting? A. For JS Held? Q. For JS Held? Q. For JS Held well, technically I'm not a partner at JS Held. A. Yeah, JS Held well, technically I'm not a partner. Since last June I'm only an employee. Q. I understand. A. I'm no longer an owner of the business. Q. I understand. A. So it's a little different role than I had for about 40 years at HSNO, but anyway, I'm just an employee and I do forensic accounting. Outside of

1	runs.	1	Q. Okay. Did anyone else from either HSNO or
2	Q. Okay. Is that	2	from JS Held or even outside of that help you work on
3	A. I kind of do the accounting for her on those.	3	your case? Did anyone else bill any time?
4	Q. Okay. But those aren't involved with Harbor	4	A. Yes. The I believe the primary person that
5	Freight Tools at all; is that correct?	5	helped me with the calculations is George a guy
6	A. I'm sorry, I didn't quite catch that question.	6	named George McLaughlin who I refer to as a senior
7	Q. Your other businesses that you're involved in	7	economist. I think his title in JS Held is something
8	don't have any contingency with Harbor Freight Tools?	8	like let's see, an AVP, assistant vice president
9	A. I didn't quite I can't quite hear the last	9	maybe, but he did a fair amount of the work for me on
0	two words you said.	10	this case. And then also early on I had another
1	Q. Do your other businesses have anything to do	11	associate, and I think his title is his name is
2	with Harbor Freight Tools? Do they involve Harbor	12	Brenden Howell and he was he's an analyst with JS
3	Freight Tools?	13	Held and he had prepared or started to prepare some
4	A. Oh, no, no, no.	14	of the calculations.
5	Q. Okay. I want to go to another exhibit. I'm	15	Q. Okay. So I'm going to back up a little bit.
6		1	
7	going to mark as Exhibit B, it's a document that says	16 17	I think you mentioned you're an executive vice
	HSNO Seattle Rate Schedule 2019.	1	president, VP, at JS Held. Does that entail anything
8	A. Okay.	18	other than your forensic accounting work that you're
9	Q. Let me know when you have that open.	19	testifying about today?
0	A. I have that open.	20	A. Oh, you mean do I have administrative duties,
1	Q. Okay. Are the rates listed here your current	21	that sort of thing?
2	rates for this case?	22	Q. Yeah.
3	A. No. And I'm curious why you have this	23	A. Not really. I I'm kind of left out of
4	particular page because we are not HSNO any longer,	24	management, so despite the title, I really don't have
2.5	we're JS Held, and the rates are somewhat somewhat	25	any management responsibilities to speak of other than
	Page 14		Page 1
1	different than reflected here.	1	managing the files that I'm working on. So I don't
2	Q. Okay. So can you just let me what is your	2	deal with HR issues or employees, things of that
3	deposition or trial testimony per hour for you? I	3	nature, so I'm kind of lucky in that regard.
4	A. 550	4	Q. And I think you mentioned that you thought
5	Q understand it's not I'm sorry.	5	George McLaughlin is an assistant vice president. What
	-		
6	A Yean sorry \$550 per nour is my restitying	6

1	\$170 per hour. I'd have to look it up, but it's	1	Q. Since then what other testimony have you
2	something in that range.	2	given?
3	Q. Have you prepared any invoices to Harbor	3	A. I I can never remember. Let me just I
4	Freight Tools or to defense counsel in this case?	4	can look at my calendar and just kind of look back.
5	A. Yes.	5	Q. Well, if you can provide an updated list that
6	Q. Do you know how much you've billed so far to	6	would be great. Is that something you would agree to?
7	date?	7	A. Sure, yeah.
8	A. Yes. I think it's well, as far as the	8	MS. MARTIN: We can provide that.
9	invoicing I think it's about \$7,200 is what has been	9	MS. LUKE: Thank you.
10	invoiced.	10	Q. (BY MS. LUKE) To your knowledge, have you
11	Q. Do you have any I guess other categories that	11	ever been excluded as an expert under a prior Daubert
12	you would be billing under other than testimony or	12	challenge?
13	consultation, maybe document review or some other	13	A. No.
14	category?	14	Q. Have you ever been a party to a lawsuit?
15	- ·	15	A. No.
	A. You're asking me what kind of categories I		
16	would be billing under? Q. Yes.	16 17	Q. Have you ever testified for or on behalf of
17		1	any attorneys involved in this case?
18	A. In the time well, in the timekeeping system	18	A. Well, when you say "on behalf of," you mean on
19	we have NetSuite and yes, so they'll have kind of a	19	a personal level or are you talking about like this
20	drop-down menu when I go to bill a file and it will	20	where I'm testifying on behalf of Harbor Freight Tools?
21	have things that I can choose from like document review	21	Q. On behalf of one of their clients.
22	or reports or meetings. There are a variety of things	22	A. Oh, okay. I did see that it looked like on
23	and so I click on one of those that I think is the most	23	one of the documents I saw Foley Mansfield is involved
24	appropriate and then then I put in my time, but I	24	in this matter and there was an attorney I can't
25	also provide usually a description. It calls for	25	remember the attorney's name now, but it's somebody
4 5 6 7	is 550 an hour and then your consultation rate was 425 an hour I believe. Do you have any other rates that you charge in this case? A. Oh, no, 525 was my	4 5 6 7	you've testified on cases with that attorney? A. No. I mean, actually I think that more often I've worked with other Foley Mansfield attorneys on a more regular basis.
8 9 10 11 12 13 14	 Q. Okay. A you know, consulting rate. But no, it's whenever I'm doing the non-testifying work I charge at the \$525 per hour. Q. All right. I'm going to go back to Exhibit A again and I'm on page 12 of that PDF. A. Okay. Q. And this is your recent testimony list; is 	8 9 10 11 12 13 14 15	 Q. When did you when were you retained in this case? A. I don't recall, probably a couple months ago. I'd have to go back and look. Q. Can you identify the materials that you've reviewed in preparation for your report that you've offered in this case. A. Sure. I'm going to refer to an exhibit in my
9 10 11 12 13 14	 A you know, consulting rate. But no, it's whenever I'm doing the non-testifying work I charge at the \$525 per hour. Q. All right. Mark R. Newton, CPA

	Page 29		Page 31
1	A. And this would be which are you talking	1	the various categories that Mr. Gann outlined in his
2	about my first report or the second report?	2	report.
3	Q. I'm sorry, that's your supplemental report,	3	Q. Okay. And as far as that increased earnings,
4	Exhibit D.	4	what what does that go to as far as how high does
5	A. Sure, okay. So you want to start on Schedule	5	that go? I know that there was a median there was
6	1.0?	6	talk about median wages, 75th percentile. Where would
7	Q. Sure. I mean, if you can just because, you	7	he land based on your calculations here?
8	know, it's been less than 24 hours since we received	8	A. Yes, what I did was to to let me just
9	this	9	check my footnotes to make sure I state this. So
10	A. Sure.	10	and I'm referring to page Schedule 2.0, which is on
11	Q if you can summarize your opinion and if I	11	page 10 of the PDF. This is in the footnote area for
12	have follow-ups I can do that.	12	Schedule 2.0.
13	A. Okay. Yeah, and it's there's sort of	13	Q. Okay.
14	it's set up similarly, but there's a you know, quite	14	A. So what I did is once he graduates I assumed
15	a bit of a different result on this report based on	(15)	that he would receive a job at the 10 percentile level
16	Mr. Gann's opinions and assessment. But it's a similar	(16)	of earnings for the first two years. After that he
17	setup on the subsequent schedule so but I'll start	17	would graduate to 25 percentile level for three years.
18	on Schedule 1.0 which is page 8 of the PDF of the	18	Then I assumed he would then achieve a median wage
19	exhibit.	19	level starting after five years, and then after ten
2.0	Q. Okay.	20	years I assumed that he would obtain a he would
21	A. And this is just a summary of the calculation,	21	reach the 75 percent percentile level.
22	and what I show are the losses and mitigation for the	22	Q. Do you know since we're looking at page 10
23	past and future in total. You can see in the third	23	here, do you know if these categories that Carl Gann
24	column over which is entitled Lost Wages As Diesel	24	has outlined, architect, mechanical engineer,
25	Mechanic, all together for total damages I show a total	25	electrical engineer, etcetera, do you know if those are
<u> </u>			
	Page 30		Page 32
1	lifetime damage over his work life of \$1,119,853, and	1	only inclusive of bachelor degree earners or do those
2	ultimately the mitigation earnings I show as an	2	wages reflect people who have bachelor's plus a
(3)	equivalent amount so that there ends up being no loss,	3	master's or perhaps even a Ph.D. education?
(4)	and in reality, based on Mr. Gann's report, if	4	
(5)			A. I don't know. I assume that they related to a
	Mr. Nazar can get a four-year degree and obtain a	5	four-year degree because that was my understanding of
(6)	position in some of the careers that Mr. Gann mentioned	5 6	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that
(6) (7)	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime	5 6 7	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be
6 7 8	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a	5 6 7 8	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated
6 7 8 9	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed	5 6 7 8 9	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and
6 7 8 9	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on	5 6 7 8 9	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially.
6 7 8 9 (10) 11	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule.	5 6 7 8 9 10	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that
6 7 8 9 10 11 12	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at	5 6 7 8 9 10 11 12	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data?
6 7 8 9 10 11 12 13	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at right now, I think it's page 8 of Exhibit D, you have a	5 6 7 8 9 10 11 12 13	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data? A. No.
6 7 8 9 10 11 12 13 14	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at right now, I think it's page 8 of Exhibit D, you have a column that says Mitigation Earnings. What all is	5 6 7 8 9 10 11 12 13 14	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data? A. No. Q. Now, I believe in your previous report
6 7 8 9 10 11 12 13 14	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at right now, I think it's page 8 of Exhibit D, you have a column that says Mitigation Earnings. What all is included in mitigation earnings? I assume it's income?	5 6 7 8 9 10 11 12 13 14	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data? A. No. Q. Now, I believe in your previous report actually let me pull this up. So I'm going to
6 7 8 9 10 11 12 13 14 (15)	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at right now, I think it's page 8 of Exhibit D, you have a column that says Mitigation Earnings. What all is included in mitigation earnings? I assume it's income? A. Yeah.	5 6 7 8 9 10 11 12 13 14 15	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data? A. No. Q. Now, I believe in your previous report actually let me pull this up. So I'm going to Exhibit A and page 5 of that PDF.
6 7 8 9 10 11 12 13 14 15 16 17	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at right now, I think it's page 8 of Exhibit D, you have a column that says Mitigation Earnings. What all is included in mitigation earnings? I assume it's income? A. Yeah. Q. Assuming the four-year degree?	5 6 7 8 9 10 11 12 13 14 15 16	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data? A. No. Q. Now, I believe in your previous report actually let me pull this up. So I'm going to Exhibit A and page 5 of that PDF. A. Okay.
6 7 8 9 10 11 12 13 14 15 16 17	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at right now, I think it's page 8 of Exhibit D, you have a column that says Mitigation Earnings. What all is included in mitigation earnings? I assume it's income? A. Yeah. Q. Assuming the four-year degree? A. Correct, yes. So the mitigation earnings are	5 6 7 8 9 10 11 12 13 14 15 16 17	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data? A. No. Q. Now, I believe in your previous report actually let me pull this up. So I'm going to Exhibit A and page 5 of that PDF. A. Okay. Q. The second bullet point from the very bottom,
6 7 8 9 10 11 12 13 14 15 16 17 18	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at right now, I think it's page 8 of Exhibit D, you have a column that says Mitigation Earnings. What all is included in mitigation earnings? I assume it's income? A. Yeah. Q. Assuming the four-year degree? A. Correct, yes. So the mitigation earnings are comprised of reimbursed or payments from Washington L&I	5 6 7 8 9 10 11 12 13 14 15 16 17 18	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data? A. No. Q. Now, I believe in your previous report actually let me pull this up. So I'm going to Exhibit A and page 5 of that PDF. A. Okay. Q. The second bullet point from the very bottom, the second sentence of that is you offered an
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at right now, I think it's page 8 of Exhibit D, you have a column that says Mitigation Earnings. What all is included in mitigation earnings? I assume it's income? A. Yeah. Q. Assuming the four-year degree? A. Correct, yes. So the mitigation earnings are comprised of reimbursed or payments from Washington L&I which I assume that he Mr. Nazar would be able to	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data? A. No. Q. Now, I believe in your previous report actually let me pull this up. So I'm going to Exhibit A and page 5 of that PDF. A. Okay. Q. The second bullet point from the very bottom, the second sentence of that is you offered an alternative and this is an assumption where
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at right now, I think it's page 8 of Exhibit D, you have a column that says Mitigation Earnings. What all is included in mitigation earnings? I assume it's income? A. Yeah. Q. Assuming the four-year degree? A. Correct, yes. So the mitigation earnings are comprised of reimbursed or payments from Washington L&I which I assume that he Mr. Nazar would be able to receive through the end of his college education	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data? A. No. Q. Now, I believe in your previous report actually let me pull this up. So I'm going to Exhibit A and page 5 of that PDF. A. Okay. Q. The second bullet point from the very bottom, the second sentence of that is you offered an alternative and this is an assumption where Mr. Nazar reaches a median wage level for a diesel
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at right now, I think it's page 8 of Exhibit D, you have a column that says Mitigation Earnings. What all is included in mitigation earnings? I assume it's income? A. Yeah. Q. Assuming the four-year degree? A. Correct, yes. So the mitigation earnings are comprised of reimbursed or payments from Washington L&I which I assume that he Mr. Nazar would be able to receive through the end of his college education period. And he has been receiving it up as far as I	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data? A. No. Q. Now, I believe in your previous report actually let me pull this up. So I'm going to Exhibit A and page 5 of that PDF. A. Okay. Q. The second bullet point from the very bottom, the second sentence of that is you offered an alternative and this is an assumption where Mr. Nazar reaches a median wage level for a diesel mechanic that does not increase after that except for
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. So in this schedule that we're looking at right now, I think it's page 8 of Exhibit D, you have a column that says Mitigation Earnings. What all is included in mitigation earnings? I assume it's income? A. Yeah. Q. Assuming the four-year degree? A. Correct, yes. So the mitigation earnings are comprised of reimbursed or payments from Washington L&I which I assume that he Mr. Nazar would be able to receive through the end of his college education period. And he has been receiving it up as far as I know up to this date, so I assume that that would	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	four-year degree because that was my understanding of what Mr. Gann was providing in his report, that information. He indicated that Mr. Nazar would be capable of getting a four-year degree and he indicated these types of fields that he had the capability and interest in potentially. Q. Could you don't know which source that Mr. Gann was relying on for that data? A. No. Q. Now, I believe in your previous report actually let me pull this up. So I'm going to Exhibit A and page 5 of that PDF. A. Okay. Q. The second bullet point from the very bottom, the second sentence of that is you offered an alternative and this is an assumption where Mr. Nazar reaches a median wage level for a diesel mechanic that does not increase after that except for normal inflation. Why is it that in your previous
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	position in some of the careers that Mr. Gann mentioned in his report, his earning potential over his lifetime is much greater than what it would have been as a diesel mechanic. So his overall earnings will exceed the diesel mechanic earnings and that's shown on schedule the next schedule. Q. Page 33 Page 35 75th percentile within, I think you said, five years? 1 for someone to receive almost 30 percent of their 1 A. Well, actually ten years. 2 earnings as benefits? A. Yes, particularly for these types of Q. Ten years? 3 relevant to A. So it would be ten years that he -- yeah. positions, yes, 29.9 percent would be a, I think, 4 5 actually somewhat conservative average benefit level Well, I mean, I provided two alternatives in my first report. the credibility 6 for these types of professional positions. The second of those was making the assumption that Mr. of the experts Nazar would stabilize at the median level for 7 Q. What is the source for that 29.9 or -- for the data? a diesel mechanic. The first, though, was using kind 8 of a similar ramp up of increased earnings based on the 9 A. I believe -- you know, I don't recall. I'll percentile levels for diesel mechanics that Ms. Tapia 10 have to look that up. I didn't review that this morning. I believe typically we would get it from used in her report. So I was just offering an 11 12 alternative, a different way to look at it. Bureau of Labor Statistics. 13 Q. So -- but you believe that with the additional Q. Okay. Is there anything else you wanted to education -- or you're accepting, I guess, an 14 walk me through with the most recent report in your assumption that with the additional education Mr. Nazar 15 16 can get up to the 75th percentile in these professional 16 A. Sure, yeah. I think if we look at page 9 of 17 17 the PDF, this is the -- sort of the guts of the A. Yes, in my second report, yes, yes, and that's 18 calculation showing all the information that leads to according to Mr. Gann. Now, he -- Mr. Gann did not 19 19 the summary on Schedule 1.0, and so it just shows the 20 provide the exact time frame over which Mr. Nazar would 20 annual amounts for lost earnings, the annual amounts 21 have ultimately achieved the 75 percentile level. The 21 for mitigation earnings and retraining, and then we 22 22 time frames over which he graduates to the level that I identify it for the period of time that -- the length 23 23 just talked about in my footnote in that report is -of time for each of the rows because not every row is 24 24 is just an estimate by myself in that regard. one year and then we show the discounted amounts. 25 Q. Okay. If we can go back to Exhibit D on page 25 Now, what I do want to point out is a change Page 34 Page 36 1 8? that we talked about earlier this morning where I found 2 A. Yes. 2 an error on the schedule. If you look at the middle 3 Q. Just going back to that mitigation earnings, I 3 column under the heading Loss & Mitigation Portion of think you mentioned that you have included -- you've --4 Year, and then there's the Mitigation Earnings -5 5 L&I payments, and so you assumed he'll continue to Retraining, and you'll see the first number is \$25,610. 6 receive that through college. What do you base that 6 Q. Yes. 7 assumption on? 7 A. Do you see that? That number should be -- I 8 8 A. I base that assumption on the fact that he has can't remember the number, but it should have been --9 9 been receiving it, and the assumption is is that he we multiplied 25,610 by the figure in the third column 10 still would not be working because of his injury at 10 which says Period in Years 0.78, do you see that? 11 that point. So I assumed that he will continue to 11 Q. Okay. So it was an adjustment because it 12 receive those benefits because of that. 12 wasn't a full year? 13 13 A. Because it's not a full year. But when we did Q. And then you said that it would also include 14 his earnings which would increase over time. 14 the calculation we mistakenly treated it as a full 15 15 year. So that affects that number. The next two Q. Does it include -- does it also include 16 16 numbers are okay because they're full year, but then 17 benefits? 17 the same problem exists for that fourth column down 18 A. Let's see, yes, we've included benefits. If 18 where it says \$27,040, that should have been multiplied 19 19 you again look at page 10 of Exhibit D, the PDF 10, by 0.62. 20 you'll see that we've calculated the wages of the 20 Q. Okay. different types of jobs for the various percentile 21 21 A. So -22 levels we discussed and then we add 29.9 percent as 22 MS. LUKE: If you have the correct 23 23 version, if you want to screen share maybe we can mark 24 Q. And as far as the benefits, I guess, on that 24 that as -- let's see, we're on Exhibit F. 25 line, 29.9, that's almost 30 percent. Is that typical 25 MS. MARTIN: You should see it now and

9 (Pages 33 to 36)

	Page 37	Page 39
1	it should start with we're on the third column, top	1 columns over to the right, that reflects the point at
2	line, three rows over should be 19,976; is that right,	which the cumulative mitigation earnings exceed the
3	Mr. Newton?	cumulative losses that Mr. Nazar had suffered. So, in
4	THE WITNESS: Yes.	other words, by the years 2030, Mr. Nazar would have
5		mitigation earnings of about \$650,000 in the far right
	MS. MARTIN: Okay.	
6	MS. LUKE: Okay. So if you can	6 column compared to cumulative losses of about \$641,000.
7	circulate that and then Patsy can get that marked as	So by that point, sometime in 2030, he will have been
8	Exhibit F.	about break even at that point.
9	MS. MARTIN: Not a problem.	9 Q. So I know that you had incorporated the L&I
10	MS. LUKE: Thank you.	payments into the mitigation earnings. Did where
11	A. Now, that same issue affects one of the	1 mean, how how where is that and how can we see
12	schedules and one of the scenarios. The scenario I had	that here in this spreadsheet?
13	of the diesel mechanic at median wage that same mistake	A. So if you look in the second column or the
14	occurs.	middle very middle column that says Mitigation
15	Q. (BY MS. LUKE) In the previous I'm sorry.	Earnings - Retraining, again, that's the area where I
16	A. Yes.	made the mistake before, so the \$19,976 reflects the
17	Q. In the previous report from Exhibit A?	the L&I earnings and then the \$25,610 reflects that.
18		
	A. Yes. So there's a slight change to that	
19	number where it increases the lowers the mitigation	19 What year does that
20	so the loss calculation goes up by around \$30,000.	A. I have that I have that continuing
21	MS. MARTIN: One second here and I'll	through let's see. I have that continuing through
22	share that with you as well. Is this what you're	22 2024.
23	referring to, Mr. Newton?	23 Q. And that's when you assumed that Mr. Nazar
24	THE WITNESS: Is that yes, exactly,	24 would finalize his school?
25	yeah.	25 A. Yes.
		7 40
	Page 38	Page 40
1	Q. (BY MS. LUKE) So this is the correct	1 Q. Or a bachelor's degree?
2	calculation that should have been in the Exhibit A	2 A. Yes.
3	second scenario?	3 Q. Okay. Does the mitigation earnings also
4	A. Yes.	
	A. 165.	4 include the cost of tuition?
5		
	Q. Okay. So let's mark this as Exhibit G, and	5 A. The cost of tuition, let me see here. Yes, it
6	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A.	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in
6 7	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a
6 7 8	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years
6 7 8 9	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per
6 7 8 9 10	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F.	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the
6 7 8 9 10 11	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of
6 7 8 9 10 11	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there.	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's
6 7 8 9 10 11 12	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that
6 7 8 9 10 11 12 13 14	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here?	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure.
6 7 8 9 10 11 12 13 14 15	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here? A. The highlights well, the first highlight	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure. Q. Okay. As far as college or a bachelor's
6 7 8 9 10 11 12 13 14	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here? A. The highlights well, the first highlight just represents the point at which Mr. Nazar would have	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure. Q. Okay. As far as college or a bachelor's degree, are you making any assumptions as far as how
6 7 8 9 10 11 12 13 14 15	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here? A. The highlights well, the first highlight	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure. Q. Okay. As far as college or a bachelor's
6 7 8 9 10 11 12 13 14 15	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here? A. The highlights well, the first highlight just represents the point at which Mr. Nazar would have	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure. Q. Okay. As far as college or a bachelor's degree, are you making any assumptions as far as how
6 7 8 9 10 11 12 13 14 15 16	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here? A. The highlights well, the first highlight just represents the point at which Mr. Nazar would have achieved the median wage of the diesel mechanic that was used by Ms. Tapia, and this is derived from the	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure. Q. Okay. As far as college or a bachelor's degree, are you making any assumptions as far as how long it will take Mr. Nazar with his injury and
6 7 8 9 10 11 12 13 14 15 16 17	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here? A. The highlights well, the first highlight just represents the point at which Mr. Nazar would have achieved the median wage of the diesel mechanic that was used by Ms. Tapia, and this is derived from the version where I used the from the first report where	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure. Q. Okay. As far as college or a bachelor's degree, are you making any assumptions as far as how long it will take Mr. Nazar with his injury and accommodations necessary to finish that degree? A. I assumed it would be four years.
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here? A. The highlights well, the first highlight just represents the point at which Mr. Nazar would have achieved the median wage of the diesel mechanic that was used by Ms. Tapia, and this is derived from the version where I used the from the first report where I used the median wage. I looked at that also this	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure. Q. Okay. As far as college or a bachelor's degree, are you making any assumptions as far as how long it will take Mr. Nazar with his injury and accommodations necessary to finish that degree? A. I assumed it would be four years. Q. And in this
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here? A. The highlights well, the first highlight just represents the point at which Mr. Nazar would have achieved the median wage of the diesel mechanic that was used by Ms. Tapia, and this is derived from the version where I used the from the first report where I used the median wage. I looked at that also this morning. If I used the other approach which gave him	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure. Q. Okay. As far as college or a bachelor's degree, are you making any assumptions as far as how long it will take Mr. Nazar with his injury and accommodations necessary to finish that degree? A. I assumed it would be four years. Q. And in this MS. LUKE: Laura, if you could just
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here? A. The highlights well, the first highlight just represents the point at which Mr. Nazar would have achieved the median wage of the diesel mechanic that was used by Ms. Tapia, and this is derived from the version where I used the from the first report where I used the median wage. I looked at that also this morning. If I used the other approach which gave him an increase over time up to the 75 percentile level it	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure. Q. Okay. As far as college or a bachelor's degree, are you making any assumptions as far as how long it will take Mr. Nazar with his injury and accommodations necessary to finish that degree? A. I assumed it would be four years. Q. And in this MS. LUKE: Laura, if you could just scroll down a little bit to the bottom, thank you.
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here? A. The highlights well, the first highlight just represents the point at which Mr. Nazar would have achieved the median wage of the diesel mechanic that was used by Ms. Tapia, and this is derived from the version where I used the from the first report where I used the median wage. I looked at that also this morning. If I used the other approach which gave him an increase over time up to the 75 percentile level it doesn't change really the overall result of the opinion	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure. Q. Okay. As far as college or a bachelor's degree, are you making any assumptions as far as how long it will take Mr. Nazar with his injury and accommodations necessary to finish that degree? A. I assumed it would be four years. Q. And in this MS. LUKE: Laura, if you could just scroll down a little bit to the bottom, thank you. Q. (BY MS. LUKE) In this scenario that you've
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Okay. So let's mark this as Exhibit G, and it's really an addendum to what you had in Exhibit A. MS. MARTIN: Yes. And it's a substantive change of approximately \$30,000, and then the other change was a net change of zero for Exhibit F. MS. LUKE: Okay. Can we go back to Exhibit F? I just had a couple questions on there. Q. (BY MS. LUKE) Mr. Newton, what are the highlights representing here? A. The highlights well, the first highlight just represents the point at which Mr. Nazar would have achieved the median wage of the diesel mechanic that was used by Ms. Tapia, and this is derived from the version where I used the from the first report where I used the median wage. I looked at that also this morning. If I used the other approach which gave him an increase over time up to the 75 percentile level it	A. The cost of tuition, let me see here. Yes, it does. So, in other words, you'll notice that in before he goes to college, the L&I is about \$25,000 a year, and you'll notice that during the four years where he's going to college it drops to 13,857 per year. So I took out the what I subtracted in the calculation I took out I subtracted out the cost of tuition out of there. So I so that's why that's lower. I reflected the cost of the tuition in that figure. Q. Okay. As far as college or a bachelor's degree, are you making any assumptions as far as how long it will take Mr. Nazar with his injury and accommodations necessary to finish that degree? A. I assumed it would be four years. Q. And in this MS. LUKE: Laura, if you could just scroll down a little bit to the bottom, thank you.

10 (Pages 37 to 40)

Mark R. Newton, CPA

	Page 41	Page 43
1	schedule from the old report. Can you explain that?	1 A. Correct, yeah, what he presumably would have
(2)	A. I don't let me just double-check. I don't	2 been doing but for the injury he suffered.
(3)	think that's the case. Let's see. Yeah, you're right,	3 Q. Okay. And then and I understand your
4	it probably is because the previous report carried his	4 opinion as far as the amount of college has changed,
5	work life out to 2052 and that was based on the	5 but if we go down to the end it says in 2052 his work
6	Skoog-Ciecka tables, the work life tables for a person	6 life would end in that year; is that correct?
7	with some college because the assumption he would be	7 A. Correct, yes.
(8)	in the first report was that he would achieve an	Q. So given that his work life expectancy with no
9	associate's degree from a junior college. And in this	9 GED before injury was 2041, does education totally
10	report, the newer report, I'm assuming a four-year	10 mitigate his ability to continue working despite his
11	degree. So when you look at the tables, the	injuries so that he would be able to continue working
(12)	definitely the work life of an individual goes up as	12 until 2052?
(13)	they have more education. It's even greater for those	13 A. I don't think I understand the question.
14	that get doctorate degrees and professional degrees	14 Q. Do you think his injuries have any bearing on
15	like a lawyer and so forth.	15 his work life expectancy?
16	Q. And so I understand that the work life is	16 A. I don't know. You mean in terms of where I'm
17	not it's not specific to Mr. Nazar, but with someone	assuming or I have calculated from the tables that he
18	who is injured and has his damages, do you think it's	has a work life through 2052, I guess what you're
19	fair to expect a longer work life expectancy for	asking me is will his injury does that have some
20	someone in his situation if he received a four-year	20 impact on what his work life might be compared to what
21	degree versus a two-year degree?	the tables would show; is that what you're saying?
22	A. I'm not sure I understand the question.	22 Q. Yes, sure, yeah.
23	Q. Can you I mean, for Mr. Nazar specifically,	A. I don't I don't know. I my gut feeling
24	would you expect that there would be a that ten-year	is it shouldn't necessarily because these are positions
25	change in work life expectancy if he had a four-year	or jobs that presumably don't require a lot of
	Page 42	Page 44
1	degree versus a two-year degree?	1 physical strenuous physical activity to do the job.
2	A. Oh, no, it's not a ten-year change, it's about	2 It's more of a professional type of a job, kind of like
3	a two-year change. So in this report we have his work	what we all do, but different obviously, but it's a
(4)	life through March of 2054, and I'm looking at my other	4 professional position that doesn't depend on his
5	report and we have it through the end of 2052. So we	5 physical capabilities or it would seem to me.
6	actually have only about a year and two and a half	6 Q. Are you aware of any accommodations that
7	months extra.	7 Mr. Nazar would need in any position, I guess, that
(8)	Q. Okay.	8 isn't physical? So for the four or, I guess, several
9	A. Based on the college degree.	9 positions that Mr. Gann has outlined, would Mr. Nazar
10	Q. And then if we go to actually I'm going	need any accommodations still to perform the duties
11	to view options?	11 necessary?
12	MS. MARTIN: Are you done with these? I	MS. MARTIN: Objection, outside the
13	can share them again later if you need to.	scope of this witness's testimony. You can answer.
14	MS. LUKE: Yeah, I think I am.	14 A. I don't know. Yeah, I couldn't tell you what
15	MS. MARTIN: Okay.	accommodations might be necessary. It's possible with
16	MS. LUKE: Thank you.	16 using a computer he would have to use more voice
17	Q. (BY MS. LUKE) So I'm looking at your previous	recognition. I don't know to the extent that he would
18	report and I understand that the Mitigation Earnings	18 be impaired to use both hands for typing and so forth,
19	column has now been amended, but I just wanted to	but my understanding there are ways to mitigate that
20	let's look at this one. If we're at page 21 of Exhibit	circumstance so that somebody can use a computer.
21	A?	Beyond that, I don't know what other needs he might
22	A. Okay, yes.	22 have.
23	Q. Okay. So in the far left, we have a work life	Q. (BY MS. LUKE) Let's see, we're still on
24	ends at 2041 if Mr. Nazar does not receive his GED, if	Exhibit A. In your previous report where you and
25	he stays as is without any retraining; is that correct?	25 I'm going back to page 5 of Exhibit A, we already

11 (Pages 41 to 44)

Mark R. Newton, CPA

	Page 45		Page 4
1	talked about this, but one of the assumptions you made	1	curious what those are about.
2	was that Mr. Nazar reaches the median level wage for a	2	A. I don't know. This probably was prepared by
(3)	diesel mechanic, but does not increase after that	3	Mr. Howell. I didn't ask him about what these
4	except for normal inflation.	4	highlights mean.
5	Do you see that?	5	Q. Okay. Okay. Let's go back to Exhibit A. I
6	A. Yes.	6	guess my main concern is what opinions from Exhibit A
7	Q. It was the second-to-last bullet point there?	7	do you no longer have or are replaced by your opinions
8	A. Yes, yes, I have it here.	8	in Exhibit B, and I want to start at I think it's
9	Q. Okay. Is your what do you base that median	9	page 7.
.0	off of? What is the basis for that conclusion?	10	A. Okay.
1	A. Well, it's an assumption, so it's not but I	11	Q. So at the top of page 7 you are assuming the
2	think what I was thinking at the time was that that	(12)	same inflation rate that Dr. Tapia did at 2.175 percent
3	despite the fact that Ms. Tapia was using a vocational	(13)	for future wages; is that correct?
4	rehabilitation expert to obtain some of these earnings,	(14)	A. Yes.
.5	including that Mr. Nazar might be able to achieve the	15	Q. And is that continued on in your calculation
. 6	75 percentile level for that wage category, is that	16	in Exhibit B?
.7	when we look at the historical earnings for Mr. Nazar,	17	A. Exhibit B? Sort of. I kind of changed what I
8	he typically wasn't at a completely full-time level	18	did in Exhibit D. It's a very similar calculation, but
9	based on his history. So to me that brought into some	(19)	I normally what I use is a concept called net
0	question some question into my mind that perhaps	(20)	discount rate which Ms. Tapia has not used and so what
1	that he might not attain the level of 75 percentile, so	(21)	I use typically for a net discount rate for lost
2	that's why I offered that as a as a an approach	(22)	earnings is a 1 percent net discount rate, and what
13	to determine what his damage might be if he reaches the	(23)	that number reflects is the it reflects the
2.4	median level.	24	relationship between inflation and interest rates.
2.5	Q. Okay. And this may be and hopefully it	(25)	So in simple terms, the over a long period
	Page 46		Page 48
1		1	-
1	isn't redundant. I did want to go into the Nazar schedule. I think we've marked those as Exhibit	1	of time, over like 25 years or so, the interest rates on safe government-backed securities averages about 1
3		(2)	
4	let's see, what are they, C, and those are dated	(4)	percent more than what inflation is. So you get a 1
4	4/16/20?		
_	And these are the Event schedules?		percent discount rate. So I do that rather than trying
5	A. And these are the Excel schedules?	(5)	to determine what the particular inflation rate might
6	Q. Yes, yeah.	(5) (6)	to determine what the particular inflation rate might be for a particular type of job, and part of that is to
6 7	Q. Yes, yeah.A. Okay, I have those open.	5 6 7	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the
6 7 8	Q. Yes, yeah.A. Okay, I have those open.Q. Great. So I think this includes all of your	5 6 7 8	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage.
6 7 8 9	 Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? 	5 6 7 8 9	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some
6 7 8 9	 Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my 	5 6 7 8 9	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year
6 7 8 9 .0	 Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? 	5 6 7 8 9 10	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of
6 7 8 9 .0 .1	 Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. 	5 6 7 8 9 10 11	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard
6 7 8 9 .0 .1 .2	 Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to 	5 6 7 8 9 10 11 12	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses
6 7 8 9 .0 .1 .2 .3	 Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to what I had in the first report. I used the first 	5 6 7 8 9 10 11 12 13 14	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses which is for all wages, but the inflation rate that
6 7 8 9 .0 .1 .2 .3 .4	 Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to what I had in the first report. I used the first report as a template for these, but there's a separate 	5 6 7 8 9 10 11 12 13 14 15	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses which is for all wages, but the inflation rate that Ms. Tapia is using is not just for diesel mechanics,
6 7 8 9 10 11 12 13 14	 Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to what I had in the first report. I used the first report as a template for these, but there's a separate Excel file for the first report. 	5 6 7 8 9 10 11 12 13 14 15 16	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses which is for all wages, but the inflation rate that Ms. Tapia is using is not just for diesel mechanics, it's for kind of all wage categories for the most part,
6 7 8 9 .0 .1 .2 .3 .4 .5 .6	 Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to what I had in the first report. I used the first report as a template for these, but there's a separate Excel file for the first report. Q. I guess my question, if we go to the last tab, 	5 6 7 8 9 10 11 12 13 14 15 16	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses which is for all wages, but the inflation rate that Ms. Tapia is using is not just for diesel mechanics, it's for kind of all wage categories for the most part, and so
6 7 8 9 .0 .1 .2 .3 .4 .5 .6	 Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to what I had in the first report. I used the first report as a template for these, but there's a separate Excel file for the first report. Q. I guess my question, if we go to the last tab, Tapia Calc? 	5 6 7 8 9 10 11 12 13 14 15 16 17 18	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses which is for all wages, but the inflation rate that Ms. Tapia is using is not just for diesel mechanics, it's for kind of all wage categories for the most part, and so
6 7 8 9 .0 .1 .2 .3 .4 .5 .6 .7	 Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to what I had in the first report. I used the first report as a template for these, but there's a separate Excel file for the first report. Q. I guess my question, if we go to the last tab, Tapia Calc? A. Yes. 	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses which is for all wages, but the inflation rate that Ms. Tapia is using is not just for diesel mechanics, it's for kind of all wage categories for the most part, and so Q. I guess my question was is it the same rate of inflation that you're using in your new report?
6 7 8 9 0 1 .2 .3 .4 .5 .6 .7 .8 .9	Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to what I had in the first report. I used the first report as a template for these, but there's a separate Excel file for the first report. Q. I guess my question, if we go to the last tab, Tapia Calc? A. Yes. Q. Can you explain what this is.	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses which is for all wages, but the inflation rate that Ms. Tapia is using is not just for diesel mechanics, it's for kind of all wage categories for the most part, and so Q. I guess my question was is it the same rate of inflation that you're using in your new report? MS. MARTIN: Excuse me, I was on mute.
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to what I had in the first report. I used the first report as a template for these, but there's a separate Excel file for the first report. Q. I guess my question, if we go to the last tab, Tapia Calc? A. Yes. Q. Can you explain what this is. A. I think what this is I didn't really focus	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses which is for all wages, but the inflation rate that Ms. Tapia is using is not just for diesel mechanics, it's for kind of all wage categories for the most part, and so Q. I guess my question was is it the same rate of inflation that you're using in your new report? MS. MARTIN: Excuse me, I was on mute. You cut him off so I'd like to let him finish answering
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to what I had in the first report. I used the first report as a template for these, but there's a separate Excel file for the first report. Q. I guess my question, if we go to the last tab, Tapia Calc? A. Yes. Q. Can you explain what this is. A. I think what this is I didn't really focus on this that we prepared was just it's a	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses which is for all wages, but the inflation rate that Ms. Tapia is using is not just for diesel mechanics, it's for kind of all wage categories for the most part, and so Q. I guess my question was is it the same rate of inflation that you're using in your new report? MS. MARTIN: Excuse me, I was on mute. You cut him off so I'd like to let him finish answering the question and then you can answer you can ask the
6 7 8 9 0 1 1 2 3 4 4 5 6 6 7 8 9 9 0 0 1 1 1 2 2 3 3 1 8 9 0 0 1 1 1 1 2 1 2 1 2 1 2 3 3 1 1 2 2 3 3 1 3 1	Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to what I had in the first report. I used the first report as a template for these, but there's a separate Excel file for the first report. Q. I guess my question, if we go to the last tab, Tapia Calc? A. Yes. Q. Can you explain what this is. A. I think what this is I didn't really focus on this that we prepared was just it's a regurgitation of what Ms. Tapia had calculated.	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses which is for all wages, but the inflation rate that Ms. Tapia is using is not just for diesel mechanics, it's for kind of all wage categories for the most part, and so Q. I guess my question was is it the same rate of inflation that you're using in your new report? MS. MARTIN: Excuse me, I was on mute. You cut him off so I'd like to let him finish answering the question and then you can answer you can ask the question, Rachel. So, Mr. Newton, if you want to
6 7 8	Q. Yes, yeah. A. Okay, I have those open. Q. Great. So I think this includes all of your calculations in both Exhibit A and B. Is that correct? A. This is for particularly for Exhibit B, my second report, right, that's B? Q. Okay. A. And then I mean, they're similar looking to what I had in the first report. I used the first report as a template for these, but there's a separate Excel file for the first report. Q. I guess my question, if we go to the last tab, Tapia Calc? A. Yes. Q. Can you explain what this is. A. I think what this is I didn't really focus on this that we prepared was just it's a	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	to determine what the particular inflation rate might be for a particular type of job, and part of that is to avoid kind of a misconception when you look at the amount of wage. For instance, Ms. Tapia calculates at some point that I believe they get up to \$135,000 a year or more for a diesel mechanic after 30 or 40 years of work, and that seemed like a high number, so it's hard to know whether that inflation rate that she uses which is for all wages, but the inflation rate that Ms. Tapia is using is not just for diesel mechanics, it's for kind of all wage categories for the most part, and so Q. Mark R. Newton, CPA

	Page 49		Page 51
1	I tend to avoid not always, there's some cases where	1	for the most part we're using we're pretty
(2)	I would use a similar approach that Ms. Tapia used	2	consistent on using 1 percent net discount rate. Where
(3)	here, but most of the time I'm using the net discount	3	we vary, for instance, if somebody has a pension, say
4	rate. So the other side of the inflation rate, the	4	I I do a lot of asbestos cases and so guite often
(5)	other concept is the interest rate that you discount	5	the assumption is that the injured party or sometimes
(6)	earnings for and so that's why I believe that	6	it's a wrongful death case where the injured party or
7	relationship between inflation and interest over a long	7	decedent had a pension and sometimes those pensions do
(8)	period is about a 1 percent difference, and so I	8	not have cost of living adjustments. So in those
9	I've kind of backed into the interest rate in my	9	cases, rather than using a net discount rate I use a
10	calculation in the first report to get to a net	10	discount rate because there is no inflation for that
11	discount rate of 1 percent. In the second report	11	type of income stream as an example.
12	you'll note if you look at the details of it I just	12	Q. Okay. So let's go back to page 12 on
13	used the 1 percent discount rate.	13	Exhibit A. These are your recent testimonies. In that
14	Q. Okay. So you're getting that 1 percent	14	Lassen Tour & Travel, Inc. v. Ctour Holiday, LLC, do
15	discount rate you say it's the 1 or 3.175 percent	15	you know if you used that 1 percent net discount rate
16	minus 2.175 percent?	16	in your opinion?
17	A. Correct.	17	A. That I did not. That is a trying to
18	Q. To get the 1 percent?	18	think if I used a discount rate. I think the damages
19	A. Correct.	19	are all past if I recall correctly, past damages.
20	Q. And I guess my question is where are you	20	It doesn't involve a personal injury. It's a dispute
21	where does what is the source for the 3.175 discount	21	between two companies over unfair competition.
22	rate?	22	Q. Okay. What about Lynnwood Health Services,
23	A. Well, it's basically actually it's backing	23	Inc. v. Affiliated FM Insurance Company, et al., did
24	into it to get to a 1 percent discount rate. The 1	24	you use that 1 percent net discount rate there?
25	percent discount rate is based upon I'm looking at	25	A. No. Those are again, those are all past
	(Page) (50)		Page 52
1	the schedules which one was the Excel file, Exhibit	1	Page 52 damages in that case, so there wouldn't be a discount
2	the schedules which one was the Excel file, Exhibit D?	2	damages in that case, so there wouldn't be a discount rate applied.
3	the schedules which one was the Excel file, Exhibit D? Q. Let me see here.	2 3	damages in that case, so there wouldn't be a discount rate applied. Q. What about
2 3 4	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel	2 3 4	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal
2 3 4 5	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the	2 3 4 5	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help
2 3 4 5 6	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit.	2 3 4 5 6	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure.
2 3 4 5 6 7	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E.	2 3 4 5 6 7	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition,
2 3 4 5 6 7 8	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay.	2 3 4 5 6 7 8	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called
2 3 4 5 6 7 8	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of	2 3 4 5 6 7 8	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are
2 3 4 5 6 7 8 9	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's	2 3 4 5 6 7 8 9	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters,
2 3 4 5 6 7 8 9	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts	2 3 4 5 6 7 8 9 10	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies.
2 3 4 5 6 7 8 9 10 11	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth	2 3 4 5 6 7 8 9 10 11	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So
2 3 4 5 6 7 8 9 10 11 12 13	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth that we update each year and utilize to estimate what	2 3 4 5 6 7 8 9 10 11 12 13	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So A. There's another section later on that's the
2 3 4 5 6 7 8 9 10 11 12 13 14	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth that we update each year and utilize to estimate what we think discount rates are, and that's that's where	2 3 4 5 6 7 8 9 10 11 12 13	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So A. There's another section later on that's the asbestos litigation and those are all personal injury/
2 3 4 5 6 7 8 9 10 11 12 13 14 15	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth that we update each year and utilize to estimate what we think discount rates are, and that's that's where I derive basically my 1 percent discount rate.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So A. There's another section later on that's the asbestos litigation and those are all personal injury/ wrongful death cases.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth that we update each year and utilize to estimate what we think discount rates are, and that's that's where I derive basically my 1 percent discount rate. Q. Okay. So this is I'm sorry, that in	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So A. There's another section later on that's the asbestos litigation and those are all personal injury/ wrongful death cases. Q. I'm sorry, which page is that asbestos
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth that we update each year and utilize to estimate what we think discount rates are, and that's that's where I derive basically my 1 percent discount rate. Q. Okay. So this is I'm sorry, that in Exhibit E, that Data 2.0, this is something that your	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So A. There's another section later on that's the asbestos litigation and those are all personal injury/ wrongful death cases. Q. I'm sorry, which page is that asbestos litigation?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth that we update each year and utilize to estimate what we think discount rates are, and that's that's where I derive basically my 1 percent discount rate. Q. Okay. So this is I'm sorry, that in Exhibit E, that Data 2.0, this is something that your firm has put together, this spreadsheet?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So A. There's another section later on that's the asbestos litigation and those are all personal injury/ wrongful death cases. Q. I'm sorry, which page is that asbestos litigation? A. Yeah
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth that we update each year and utilize to estimate what we think discount rates are, and that's that's where I derive basically my 1 percent discount rate. Q. Okay. So this is I'm sorry, that in Exhibit E, that Data 2.0, this is something that your firm has put together, this spreadsheet? A. Yes. We we often have it in the Excel	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So A. There's another section later on that's the asbestos litigation and those are all personal injury/ wrongful death cases. Q. I'm sorry, which page is that asbestos litigation? A. Yeah MS. MARTIN: 15.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth that we update each year and utilize to estimate what we think discount rates are, and that's that's where I derive basically my 1 percent discount rate. Q. Okay. So this is I'm sorry, that in Exhibit E, that Data 2.0, this is something that your firm has put together, this spreadsheet? A. Yes. We we often have it in the Excel workbook as a spreadsheet.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So A. There's another section later on that's the asbestos litigation and those are all personal injury/ wrongful death cases. Q. I'm sorry, which page is that asbestos litigation? A. Yeah MS. MARTIN: 15. A. Yeah, so in the general litigation, I'm not
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth that we update each year and utilize to estimate what we think discount rates are, and that's that's where I derive basically my 1 percent discount rate. Q. Okay. So this is I'm sorry, that in Exhibit E, that Data 2.0, this is something that your firm has put together, this spreadsheet? A. Yes. We we often have it in the Excel workbook as a spreadsheet. Q. And so you just always rely on that net	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So A. There's another section later on that's the asbestos litigation and those are all personal injury/ wrongful death cases. Q. I'm sorry, which page is that asbestos litigation? A. Yeah MS. MARTIN: 15.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth that we update each year and utilize to estimate what we think discount rates are, and that's that's where I derive basically my 1 percent discount rate. Q. Okay. So this is I'm sorry, that in Exhibit E, that Data 2.0, this is something that your firm has put together, this spreadsheet? A. Yes. We we often have it in the Excel workbook as a spreadsheet. Q. And so you just always rely on that net discount rate of 1 percent in all of your reports that	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So A. There's another section later on that's the asbestos litigation and those are all personal injury/ wrongful death cases. Q. I'm sorry, which page is that asbestos litigation? A. Yeah MS. MARTIN: 15. A. Yeah, so in the general litigation, I'm not usually using a net discount rate that I can think of.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the schedules which one was the Excel file, Exhibit D? Q. Let me see here. MS. MARTIN: E, Exhibit E is the Excel file for the second report. The Excel file for the first report has not been marked as an exhibit. A. Okay. So if you look at Exhibit E. Q. (BY MS. LUKE) Okay. A. And it wasn't part of the PDF printout of the report, but if you look at that Excel file there's a tab called Data 2.0, and that accumulates all sorts of wage growth, inflation, interest rates and so forth that we update each year and utilize to estimate what we think discount rates are, and that's that's where I derive basically my 1 percent discount rate. Q. Okay. So this is I'm sorry, that in Exhibit E, that Data 2.0, this is something that your firm has put together, this spreadsheet? A. Yes. We we often have it in the Excel workbook as a spreadsheet. Q. And so you just always rely on that net	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	damages in that case, so there wouldn't be a discount rate applied. Q. What about A. And, again, it's not not a personal those are and just to help Q. Sure. A be a little efficient on the deposition, pretty much anything on this page, this is called General Litigation, so most of this these cases are going to be commercially related litigation matters, disputes between companies. Q. Okay. So A. There's another section later on that's the asbestos litigation and those are all personal injury/ wrongful death cases. Q. I'm sorry, which page is that asbestos litigation? A. Yeah MS. MARTIN: 15. A. Yeah, so in the general litigation, I'm not usually using a net discount rate that I can think of. There may be some personal injury cases on that list

13 (Pages 49 to 52)

14 (Pages 53 to 56)

Mark R. Newton, CPA

Page 57	Page 59
Q. This is based on purely on his report?	range, I'm looking at the household assistance, and he
2 A. Correct.	2 said two to four times per month for life, how did you
3 Q. Okay. Let's go ahead and mark this as	3 calculate that? Did you make did you create a range
4 Exhibit H and Laura can circulate afterwards. Should	4 in your total?
5 we go down to Schedule 2?	5 A. I know on one where he said three to five
6 A. Sure.	6 years we used four years. Let me look at the
7 Q. Okay. And so these are your calculations?	7 calculation itself so I can because I can check the
8 A. Yes.	8 formula in there for it. I just need to open up that
9 Q. Okay. So you have Physician Services, a	9 file. And this is the Orthocor, and you were looking
one-time evaluation with the hand surgeon?	at the which item were you looking at now? Oh,
11 A. Correct.	11 household
12 Q. Okay. And these unit costs, are those	12 Q. Yeah, that's just an example.
14 A. Yes.	14 the the figure that under Frequency?
Q. And the frequency, that was also provided by	15 Q. Uh-huh.
16 Mr. Gann?	16 A. And you look you see 36.0?
17 A. Yes.	17 Q. Yes.
18 Q. Okay. And so you are only calculating the	A. For that line item, that's three times per
19 discounted costs total?	month. So where he Mr. Gann indicated two to four
A. Correct, correct.	times per month we took the average of three.
Q. Okay. And that's we see that in the far	Q. Okay. Is there a reason why you didn't
22 right column?	22 provide a range?
A. Correct, yeah.	A. Well, we could have. I could have done the
Q. Okay. And so this is a	24 low and high, but I just decided to use we decided
A. There's no yeah, and to know just so you	25 to use an average.
 just slightly so we see the titles, yeah. So in the second column we show page and item, so if you look at Mr. Gann's report he has about a six-page-long document that lists out all the different services and costs. Q. Uh-huh. 	2 summary, and so this is basically a summary of your opinion with regard to the discounted rate for the life care plan; is that correct? 5 A. Yes. Q. Okay. Is there anything else on this I
A. And so, for instance, with the first item up	7 don't know if it's a PDF that you wanted to discuss as
8 there on this page that says Orthocor system 4.6, so	8 far as relating to your opinions on that life care plan
9 that's on page 4 and it's the sixth line item down	9 value?
where he has numbers. Now, not all of the line items	10 A. Sure. If we go back down to Schedule 2 again
that Mr. Gann talks about in his report show show	and maybe go to the first page, so so the reason why
costs for various reasons. So we've included all of	we didn't just list out each item, you know, page we
the categories that include a cost that we then	kind of start off that way on this page with under
extrapolate out over the over the period indicated	Physician Services, Item 1.1, 1.2, 1.3, but then you
by Mr. Gann and then we discount it. But I just so	see we jump to 2.5. So what we did was to group we
if you turn to page 4 of Mr. Gann's not his report	looked through the listing of all the of the costs
but the section where he does the calculations on the	that Mr. Gann listed and we categorized them into
life care plan, you would look at the 6.5 and down on	18 categories, so in this case physician services, and
that page and find this item.	that was so that we could apply a particular discount
20 Q. Okay. So as far as I guess there's a	20 rate for that category.
20 G. Onay. 30 as iai as i guess lifetes a	20 Tate for that category. 21 So, for instance, you'll see in the column
21 counts things. As far as itoms where there was no	· ·
couple things. As far as items where there was no	22 averte the right that's entitled to seet first veer
22 costs included in Mr. Gann's report you have not	over to the right that's entitled 1x cost, first year,
costs included in Mr. Gann's report you have not calculated those; is that correct?	and you look down a couple of rows there you see a 0.19
22 costs included in Mr. Gann's report you have not	, , ,

	Page 61		Page 6.
1	A. That's the discount rate we used. Okay?	1	back on their website?
2	Q. Okay.	(2)	A. I believe so. I can double-check that and see
3	A. So as opposed to a the net discount rate	3	what the exact source is, but but we're using
(4)	I'm using for the earnings, the wages of 1 percent,	4	generally government studies to derive these inflation
5	we're using different types of rates for the medical	(5)	rates.
6	costs.	6	Q. Okay. And when you say "we," are you
7	Q. Okay.	7	referring to the Mr. Howell and Mr. McLaughlin?
8	A. And in some cases it's a negative discount	8	A. In this case I'm referring to Mr. McLaughlin
9	rate. In other words, if you go down to	9	who's, like I said earlier, a senior economist, so
.0	Hospitalizations on that page, you'll see the negative	10	he I generally have him prepare these calculations
1	1.41. So where the cost for that surgery is \$40,000,	11	for me. I and then I reviewed it yesterday. I
2	the present value of it is \$40,285, so it's a little	12	actually changed it. I changed the premium rates to
3	bit higher because according to the you know, over	13	the 30-year average which slightly increased the
4	the last 30 years, the cost of hospitalization has	14	discount value.
5	exceeded, you know, interest rates.	15	Q. What did he calculate it at?
6	Q. Okay. So as far as your whatever	16	A. He calculated the it wasn't much of a
7	whatever rate is in that 1x column, what is the basis	17	change, but if you go back to let's see, if I look
8	or source that you're using to come up with that	18	at Schedule
9	percentage rate?	19	COURT REPORTER: Can you hear him? I
0	A. Right. So if you scroll down to let's see,	20	can't hear him.
1	Schedule 4.0, that provides that page there yeah,	21	(Discussion off the record.)
2	let's stop there for a moment. So this is Schedule	22	COURT REPORTER: "At Schedule," and then
3	4.0, and so what we're saying is that where we think	23	if you could pick up from there, I'm sorry.
4	there's a if we look just at the discount rate, we	24	A. Sure. Schedule 1.0, I've calculated \$314,000,
2.5	would project a negative discount rate, it's kind of a	25	and Mr. McLaughlin's calculation using his rates was
	Page 62		Page 6
1	real discount rate of 1 percent, and we calculate it on	1	about \$311,000 as I recall.
2	a subsequent schedule, what we call the premium over	2	Q. (BY MS. LUKE) Okay. So as far as your
3	inflation, in other words, the amount cost of these	3	opinions in this case, as we sit here today, are they
4	medical services have either been more than or less	4	contained within what we've discussed today in your
5	than overall inflation, general inflation based on CPI,	5	deposition, this life care plan present value
6	and then we add those two together and we get the	6	calculation document that we received today and the two
7	discount rate we use for each category.	7	reports you've already produced?
8	The basis for these figures in the middle	8	A. I believe so. I guess I haven't fully
9	column are shown on the subsequent schedule, 4.1, and	9	commented on some critiques of Ms. Tapia's approach.
	this lists the various indices or increase rates for	10	Q. Okay. I do have some questions about that, if
1	each of these categories over going back to 1978,	11	we go back to Exhibit A. Now, I I believe that you
2)	and if you go down to Schedule the next page on 4.1,	12	have on page 5 you discuss some of the assumptions
	we summarize the we calculate averages and I've used	13	that Dr. Tapia makes. I believe that you have adopted
	the 30-year average for the premium. So if you look at	14	some of those assumptions and not others. So if we
4	the bettern near bettern line or this year it down it	15	could go through maybe your bullet points here?
4) 5)	the bottom page, bottom line on this page it shows the	1.0	
456	premium premium over inflation for each category,	16	A. Sure.
4 5 6 7	premium premium over inflation for each category, and that's derived from the 30-year average which you	17	Q. So the first one you said that Dr. Tapia
4) 5) 6) 7) 8)	premium premium over inflation for each category, and that's derived from the 30-year average which you can see kind of up in the middle of that page where	17 18	Q. So the first one you said that Dr. Tapia assumes that Mr. Nazar would have worked full time
4) 5) 6) 7) 8) 9)	premium premium over inflation for each category, and that's derived from the 30-year average which you can see kind of up in the middle of that page where we've calculated for the average.	17 18 19	Q. So the first one you said that Dr. Tapia assumes that Mr. Nazar would have worked full time throughout his work life. Is that an assumption that
4) 5) 6) 7) 8) 9)	premium premium over inflation for each category, and that's derived from the 30-year average which you can see kind of up in the middle of that page where we've calculated for the average. Q. So these numbers, which source did they come	17 18 19 20	Q. So the first one you said that Dr. Tapia assumes that Mr. Nazar would have worked full time throughout his work life. Is that an assumption that you are making?
4) 5) 6) 7) 8) 9) 0) 1)	premium premium over inflation for each category, and that's derived from the 30-year average which you can see kind of up in the middle of that page where we've calculated for the average. Q. So these numbers, which source did they come from?	17 18 19 20 21	Q. So the first one you said that Dr. Tapia assumes that Mr. Nazar would have worked full time throughout his work life. Is that an assumption that you are making? A. I have, yes.
4 5 6 7 8 9 0 1 2	premium premium over inflation for each category, and that's derived from the 30-year average which you can see kind of up in the middle of that page where we've calculated for the average. Q. So these numbers, which source did they come from? A. They come from generally the Bureau of Labor	17 18 19 20 21 22	Q. So the first one you said that Dr. Tapia assumes that Mr. Nazar would have worked full time throughout his work life. Is that an assumption that you are making? A. I have, yes. Q. Okay. That work life of 24.5 years at the
4 5 6 7 8 9 0 1 1 2 2	premium premium over inflation for each category, and that's derived from the 30-year average which you can see kind of up in the middle of that page where we've calculated for the average. Q. So these numbers, which source did they come from? A. They come from generally the Bureau of Labor Statistics.	17 18 19 20 21 22 23	Q. So the first one you said that Dr. Tapia assumes that Mr. Nazar would have worked full time throughout his work life. Is that an assumption that you are making? A. I have, yes. Q. Okay. That work life of 24.5 years at the time of the accident for one approach, that was one of
20	premium premium over inflation for each category, and that's derived from the 30-year average which you can see kind of up in the middle of that page where we've calculated for the average. Q. So these numbers, which source did they come from? A. They come from generally the Bureau of Labor	17 18 19 20 21 22	Q. So the first one you said that Dr. Tapia assumes that Mr. Nazar would have worked full time throughout his work life. Is that an assumption that you are making? A. I have, yes. Q. Okay. That work life of 24.5 years at the

16 (Pages 61 to 64)

Mark R. Newton, CPA

	Page 65		Page 67
1	Q. And then the other approach was work life of	1	to that point in time is probably it doesn't even
2	approximately 40 years to age 67 or full social	(2)	show on the tables. It's probably less than 5 percent.
3	security retirement age.	(3)	So the chance that he would work until that age is
4	A. Correct.	(4)	certainly under 10 percent and probably under 5
5	Q. She assumed that Mr. Nazar would have	(5)	percent. It makes it very unlikely that that would
6	increased his earning capacity for a diesel mechanic in	(6)	occur and, therefore, speculative.
7	the Spokane area to the median level by age 32, the	7	Q. Do you I mean, given that Mr. Gann is
8	75th percentile wage by age 37 to 38 and the 90th	8	assessing that Mr. Nazar is in the 95th percentile in
9	percentile at age 45; is that correct?	9	his IQ, does that change your analysis as far as that
10	A. Correct.	10	point? Mr. Gann's opinion to me seems that Mr. Nazar
11	Q. And then she assumed that Mr. Nazar might not	11	has unlimited potential.
12	obtain further education and would have to accept	12	A. Well, I certainly think his IQ level certainly
13	minimum wage jobs for only part-time work 20 hours a	(13)	has a bearing on Mr. Gann's opinions and findings with
14	week because of his injury. And then the last	(14)	regard to Mr. Nazar and his ability to obtain a
15	A. Correct.	(15)	four-year degree and so certainly pertinent to that.
16	Q. Sorry. And then the last one that you have	(16)	But prior to injury he didn't have a GED and the tables
17	there was her assumption that Mr. Nazar might be able	(17)	for somebody at that level show what the work life is
18	to obtain his GED and a two-year associate's degree in	(18)	at a far lower rate than age 67, and so I the thing
19	order to obtain a better replacement job and earn more	19	is is that neither Dr. Tapia or I or Mr. Gann or
20	than minimum wage. So if you want to go through that,	20	Mr. Choppa, Choppa, can predict what would have
21	with regard to work life, I think that you had	21	occurred with Mr. Nazar in his work life had he not
22	differences in that approach. Can you tell me what	22	been injured, and so what we revert to are objective
23	your approach is on work life?	23	studies like these work life tables that are based on
24	A. Well, I used the same work life I believe in	24	government statistics and then utilized by renowned
25	the first report, this report for 24 and a half years	(25)	economists in the field to develop these tables.
	Page 66		Page 68
1	Page 66 based on his educational level and as the but for work	1	We revert to those sources because we don't
(1) (2)		1 2	-
	based on his educational level and as the but for work		We revert to those sources because we don't
2	based on his educational level and as the but for work life if he had not been injured. So it was the same in	2	We revert to those sources because we don't have any way to know. We don't know whether he would
2	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work	2 3	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether
(2) (3) (4)	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her	2 3 4	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're
2 3 4 5	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is	2 3 4 5 6 7	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's
2 3 4 5 6 7 8	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of	2 3 4 5 6 7 8	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in
2 3 4 5 6 7 8	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for	2 3 4 5 6 7 8	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in fact, use the tables to some extent and that's why I
2 3 4 5 6 7 8 9	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for the new job at the same age, and I think that's	2 3 4 5 6 7 8 9	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in fact, use the tables to some extent and that's why I use the tables and most economists that I see use the
2 3 4 5 6 7 8 9	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for the new job at the same age, and I think that's inappropriate because he has a longer work life with	2 3 4 5 6 7 8 9 10	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in fact, use the tables to some extent and that's why I use the tables and most economists that I see use the similar tables that we used in this case.
2 3 4 5 6 7 8 9 10 11	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for the new job at the same age, and I think that's inappropriate because he has a longer work life with the higher educational level. So she didn't offset the	2 3 4 5 6 7 8 9 10 11	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in fact, use the tables to some extent and that's why I use the tables and most economists that I see use the similar tables that we used in this case. Q. Okay. As far as the increasing of earning
2 3 4 5 6 7 8 9 10 11 12	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for the new job at the same age, and I think that's inappropriate because he has a longer work life with the higher educational level. So she didn't offset the extra ten years roughly according to the tables that	2 3 4 5 6 7 8 9 10 11 12 13	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in fact, use the tables to some extent and that's why I use the tables and most economists that I see use the similar tables that we used in this case. Q. Okay. As far as the increasing of earning capacity, I think you had different or differing
2 3 4 5 6 7 8 9 10 11 12 13 14	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for the new job at the same age, and I think that's inappropriate because he has a longer work life with the higher educational level. So she didn't offset the extra ten years roughly according to the tables that Mr. Nazar would have been able to work with the part	2 3 4 5 6 7 8 9 10 11 12 13 14	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in fact, use the tables to some extent and that's why I use the tables and most economists that I see use the similar tables that we used in this case. Q. Okay. As far as the increasing of earning capacity, I think you had different or differing opinions from Dr. Tapia on that as well?
2 3 4 5 6 7 8 9 10 11 12 13 14	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for the new job at the same age, and I think that's inappropriate because he has a longer work life with the higher educational level. So she didn't offset the extra ten years roughly according to the tables that Mr. Nazar would have been able to work with the part college approach that would tend to offset the losses	2 3 4 5 6 7 8 9 10 11 12 13 14 15	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in fact, use the tables to some extent and that's why I use the tables and most economists that I see use the similar tables that we used in this case. Q. Okay. As far as the increasing of earning capacity, I think you had different or differing opinions from Dr. Tapia on that as well? A. I think the only thing is I didn't get him up
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for the new job at the same age, and I think that's inappropriate because he has a longer work life with the higher educational level. So she didn't offset the extra ten years roughly according to the tables that Mr. Nazar would have been able to work with the part college approach that would tend to offset the losses that occurred up to the 24 and a half year point in	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in fact, use the tables to some extent and that's why I use the tables and most economists that I see use the similar tables that we used in this case. Q. Okay. As far as the increasing of earning capacity, I think you had different or differing opinions from Dr. Tapia on that as well? A. I think the only thing is I didn't get him up to the 90 percent level, percentile level. I think I
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for the new job at the same age, and I think that's inappropriate because he has a longer work life with the higher educational level. So she didn't offset the extra ten years roughly according to the tables that Mr. Nazar would have been able to work with the part college approach that would tend to offset the losses that occurred up to the 24 and a half year point in time.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in fact, use the tables to some extent and that's why I use the tables and most economists that I see use the similar tables that we used in this case. Q. Okay. As far as the increasing of earning capacity, I think you had different or differing opinions from Dr. Tapia on that as well? A. I think the only thing is I didn't get him up to the 90 percent level, percentile level. I think I stopped at 75 percent level.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for the new job at the same age, and I think that's inappropriate because he has a longer work life with the higher educational level. So she didn't offset the extra ten years roughly according to the tables that Mr. Nazar would have been able to work with the part college approach that would tend to offset the losses that occurred up to the 24 and a half year point in time. My other critique on the work life is the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in fact, use the tables to some extent and that's why I use the tables and most economists that I see use the similar tables that we used in this case. Q. Okay. As far as the increasing of earning capacity, I think you had different or differing opinions from Dr. Tapia on that as well? A. I think the only thing is I didn't get him up to the 90 percent level, percentile level. I think I stopped at 75 percent level. Q. Okay.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for the new job at the same age, and I think that's inappropriate because he has a longer work life with the higher educational level. So she didn't offset the extra ten years roughly according to the tables that Mr. Nazar would have been able to work with the part college approach that would tend to offset the losses that occurred up to the 24 and a half year point in time. My other critique on the work life is the assumption that he would work until 67 social security	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. That's why Dr. Tapia did, in fact, use the tables to some extent and that's why I use the tables and most economists that I see use the similar tables that we used in this case. Q. Okay. As far as the increasing of earning capacity, I think you had different or differing opinions from Dr. Tapia on that as well? A. I think the only thing is I didn't get him up to the 90 percent level, percentile level. I think I stopped at 75 percent level. Q. Okay. A. And then I had the second alternative where I
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	based on his educational level and as the but for work life if he had not been injured. So it was the same in that regard. However, a couple things on the work life. Although I think Ms Dr. Tapia, I call her Dr. Tapia, sorry, Dr. Tapia's approach there is correct, the way she applies the work life for a part college under assuming her assumption where he gets retrained and has higher education is that in one of her scenarios she stops the assumption of work life for the new job at the same age, and I think that's inappropriate because he has a longer work life with the higher educational level. So she didn't offset the extra ten years roughly according to the tables that Mr. Nazar would have been able to work with the part college approach that would tend to offset the losses that occurred up to the 24 and a half year point in time. My other critique on the work life is the assumption that he would work until 67 social security retirement level, and based on the tables for somebody	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	We revert to those sources because we don't have any way to know. We don't know whether he would have worked only 15 more years, we don't know whether he would have worked 40 years, but if we use the tables and use the median level which is the 50 percent point where it becomes more probable than not, then we're achieving something we're utilizing something that's objective in my mind. 1	but I assumed that he would be capable of working 40	1 trial?
2	hours per week.	2 A. I have no such plans at this point. If
3	Q. And that was assumption was in I guess	3 counsel directs me to do that for some reason, I would
4	correlation to Mr. Gann's report?	4 do it, of course.
5	A. No, because I prepared this report before I	5 Q. And is have we talked about all of your
6	had Mr. Gann's report.	opinions you intend to testify about at trial?
7	Q. Okay. Maybe I should distinguish. I'm	7 A. I believe so, yes.
8	wondering I want to know if that's if these are	8 MS. LUKE: So I don't believe I have any
(9)	your current opinions still today. So	9 other questions for you today. I am going to reserve
(10)	A. Oh, yes, it is. In other words, I I saw	the right to continue this deposition with regard to
(11)	that Mr. Choppa indicated he might only be able to work	the new opinions that were produced last night and
12	20 hours per week, but in looking at everything I	today after I have the chance to review them. Laura?
(13)	couldn't see why that was necessarily the case because	13 MS. MARTIN: No questions at this time.
(14)	of his disability that he wouldn't be able to obtain	And feel free to ask Mr. Newton, but I believe he would
(15)	full-time education, I I just didn't see a reason	15 like to reserve his right to read and sign.
16	I mean full-time work at 40 hours per week. So that's	16 THE WITNESS: Yes, I would.
17	where I differ in opinion with what Mr. Choppa provided	17 MS. LUKE: All right. And, Patsy, I
18	in his report that Dr. Tapia relies upon.	will order an electronic copy, please.
19	Q. Okay. Are there any other of Dr. Tapia's	19 MS. MARTIN: Same here, please.
20	analysis or assumptions that you disagree with here?	20 (Exhibits Nos. A - H were marked.)
21	A. I think that was it.	21 (Deposition concluded at 12:15 p.m.)
22		(==p===================================
	Q. Okay.	(
23	A. I think we've covered the differences in	23 pursuant to FRCP Rule 30(e).) 24
24	opinion that I have. We do have a slight difference of	25
25	opinion on the discount rate. I don't think it's	25
	Page 70	Page 72
1	Q. Yeah.	1 CERTIFICATE
2	A. I don't know how much it is, but it's slightly	2
3	different there.	3 STATE OF WASHINGTON)
4	Q. Do you typically take notes as you're)
5	coming as you're working on your reports or coming	4 COUNTY OF KING)
6	up with opinions?	5
7	A. Typically not. We usually in most of the	6 I, Patricia D. Jacoy, a Certified
8	cases we put reports in we put the notes in the	7 Shorthand Reporter in and for the State of Washington,
9	reports. So, for instance, on the Excel file that you	8 do hereby certify that the foregoing transcript of the
10	have, if you looked at Data 1.0 and Data 2.0, things of	9 deposition of MARK R. NEWTON, CPA taken on
11	that nature, in our reports a lot of times those	April 21, 2020 is true and accurate to the best of my
12	include the notes that we derive from source documents	11 knowledge, skill and ability.
13	in the file like interrogatories, sometimes deposition	12
14	notes. So we didn't really have all of that in this	13
15	case to speak of. We do have a Data 1.0, but if we had	14 Patrin Jacoy
16	a lot of notes we typically put them in the report.	Patricia D. Jacoy, CSR 2348
17	Q. Okay. So you didn't you didn't take any	16
18	notes on the depositions other than what's noted here	17
19	in the Data 1.0 or 2.0?	18
20	A. Correct. I did not.	19
21	Q. Did you have you discussed the case with	20
22	any other experts that were retained in this case?	21 22
23	A. No.	22 23
1	O And do you have any assessed plane to consult	
24	Q. And do you have any current plans to consult	24
